Profile

Final-year **BSc (Hons) in Information Technology** undergraduate at the **University of Jaffna** with hands-on experience in designing and delivering **end-to-end software features** across UI, REST APIs, and data layers. Strong foundation in **Java** and **Spring Boot** fundamentals including controllers, services, dependency injection, and configuration. Experienced with **REST/HTTP**, JSON-based APIs, SQL queries, and Git-based collaboration. Skilled in building **responsive frontends** using HTML, CSS, and JavaScript, along with server-side rendering using **JSP**. Familiar with **JWT-based authentication**, Spring Security concepts, and API testing using **Postman**. A motivated learner with strong problem-solving skills, clear communication, and an ownership mindset to deliver reliable and maintainable software. Seeking a **Software Engineer Internship** to contribute to production-grade development and learn performance tuning and system reliability.

Technical Skills

- **Programming Languages:** Java, JavaScript, Python, C, C++
- **Backend:** Spring Boot, Spring (Controllers, Services, Dependency Injection), REST/HTTP, JSON, error handling, logging
- **Frontend:** HTML, CSS, JavaScript, responsive layouts, browser developer tools
- **Templating:** JSP, Thymeleaf (familiar)
- **Frameworks & Libraries:** React, React Native, Node.js, Express.js
- **Databases:** MySQL (SQL queries, schema basics), MongoDB
- **Tools:** Git, GitHub, Postman, VS Code, Linux/CLI basics

Education

- **Bachelor of Science (Hons) in Information Technology** | University of Jaffna (2022 – 2026)
Current GPA: 3.77
- **Certificate Course in Java Application Development** | NIBM (2021 – 2022)
- **St. Paul's Girls' School, Milagiriya** (2007 – 2020)
(A/L – Common Stream)

Projects

- **LuxStay** (Oct 2025 – Dec 2025)
AI-Powered Hotel Booking Platform
Developed a full-stack web application featuring AI-based hotel search, secure payments (Stripe), authentication and role management, REST API integrations, and a responsive UI optimized for booking workflows
Tech Stack: React, Redux, TypeScript, TailwindCSS, Node.js, Express.js, MongoDB, Git
[Github](#) | [Demo](#)
- **CodeReviewAI** (Dec 2025)
AI-Powered Code Analysis & Auto-Fix Platform
Built a Spring Boot REST middleware layer with structured error handling and logging; integrated AI-based code analysis to detect bugs and code smells while focusing on maintainable API design
Tech Stack: Spring Boot, React, Python (AI backend), Git
[Github](#) | [Demo](#)
- **CampusCart Mobile App (Group Project)** (Nov 2024 – Apr 2025)
University Marketplace Application
Implemented REST APIs with JWT authentication, JSON responses, and database operations; collaborated using Git, debugged issues, and delivered features iteratively in a team environment
Tech Stack: React Native, JavaScript, Node.js, Express.js, MongoDB, Python, Git
[Github](#)

Volunteering

- Executive Committee Member – Membership Development Team, IEEE (2024)
- Member – Information Technology & Computing Society (ITCS)
